

Encourage the development of municipal newsletters that include waste and recycling information
Development of a plan to target each sector present in the County (i.e. colleges, elementary schools, restaurants, bars, etc.) to encourage/support recycling and discuss waste collection/reduction methods
Expand current education through the use of social media, i.e. twitter, Facebook, etc. to educate residents/businesses
Develop a County newsletter that includes waste and recycling information
Encourage schools to develop recycling programs
Educate members of the County staff, County Commissioners, etc. so that all "core" local members understand the County's waste and recycling initiatives, goals, options, etc.
Develop a community calendar that includes waste and recycling information
Require and/or encourage haulers to provide education and/or helpful hints to residents and the County semi-annually, informing them on how to and what to recycle and dispose of
Encourage big event activities to recycle by recognizing how much of the event waste goes into the trash
Develop a method to reach out to the commercial businesses in the County to discuss recycling, obtain recycling tonnages, etc.
Develop PSAs to use on local TV, public access channels and local radio networks to educate residents/businesses
Encourage the development of school competitions to get the community involved in recycling, or the participation in other state and national recycling/waste collection competitions
Be a presence at local fairs, festivals, and big event activities
Start a pledge program in the municipalities/County-wide for residents that encourages recycling and promotes proper disposal of waste
Develop a give back program for residents that take part in the pledge program
Target waste reduction and recycling at local bars and restaurants
Target waste reduction and recycling at local businesses
Implement solar compost trash cans for use in urban areas
Development of recycling education literature in multiple languages
Develop contamination education for the drop-offs
Develop education regarding pharmaceutical collection
Develop education that encourages the purchase of recycled material, incentives may be created as well
Develop Apartment Complex/Multifamily Buildings recycling literature

Recycling Collection and Waste Disposal Initiatives
Maintaining the existing permanent recyclables drop-off facilities
Develop a permanent income source to support the drop-off locations
Explore permanent HHW and/or e-waste collection
Streamline the recyclables collected curbside and/or at drop-offs with all local haulers in the County
Purchase surveillance cameras that move around to different drop-off sites and illegal dumping sites
Develop a hotline for illegal dumping and open burning reporting
Supporting Spring/Fall Cleanup at municipalities
Developing semi-annual County-wide e-waste collection events
Encouraging semi-annual (at minimum) spring cleanup collection events (sponsored by the municipality/school district/ private sector)
Recycling drop-off centers with 24/7 hours managed by 1 or more municipalities
Encourage a Pay-As-You-Throw waste disposal system with local haulers
Adding additional recyclables material to existing drop-off facilities
Investigating the ability to implement a swap out location using existing infrastructure (residents/businesses drop-off usable material for others to take, there would be an annual fee to
belong
Moving from single stream recycling at drop-offs to source separated recycling at drop-offs
Partner with local enforcement for illegal dumping and open burning
Encouraging contracted curbside waste collection for commercial businesses, including mandatory recyclables collection through draft contracts supplied to businesses
Contracting with waste haulers for curbside HHW and/or electronics collection
Contracting with waste haulers for curbside food waste collection
Develop a method for more comprehensive reporting of recyclables collection to the County
Develop more permanent yard waste drop-off locations (municipal or County-wide)
Develop a permanent compost facility (shared use by all residents of SCCSWA)
Ordinances that require waste haulers to collect bulk items and recyclables curbside and education to residents semi-annually
Encouraging contracted residential curbside waste collection, including mandatory curbside recyclables collection through draft contracts supplied to municipalities
Developing a public/private partnership for waste and recycling collection and infrastructure
Development of County ordinances that mandate residential recycling
Development of municipal ordinances that mandate residential recycling
Development of County ordinances that mandate commercial recycling
Development of municipal ordinances that mandate commercial recycling
Development of municipal ordinances that mandate commercial food waste composting
Develop waste and recycling initiatives for local fairs and festivals
Partner with local professional sports teams to develop waste reduction and recycling programs
Increase recycling activities at University events
Integrating aspects of the hazard mitigation plan to ensure waste disposal and emergency relief in times of need
Develop a hauler registration program
Investigate glass recycling markets
Investigate solutions to illegal dumping and open burning of recyclable material and/or MSW
Consider a zero-waste concept over the ten-year planning period
Investigate volunteer opportunities to assist the Recycling Coordinator with recycling education

Rank from 1-5. 1 being very important for this planning period in Huntingdon, Bedford, or Fulton County, 5 being not important for this planning period to Huntingdon, Bedford or Fulton County.

High Mid Low

Encourage the development of municipal newsletters that include waste and recycling information
Development of a plan to target each sector present in the County (i.e. colleges, elementary schools, restaurants, bars, etc.) to encourage/support recycling and discuss waste collection/reduction methods
Expand current education through the use of social media, i.e. twitter, Facebook, etc. to educate residents/businesses
Develop a County newsletter that includes waste and recycling information
Encourage schools to develop recycling programs
Educate members of the County staff, County Commissioners, etc. so that all "core" local members understand the County's waste and recycling initiatives, goals, options, etc.
Develop a community calendar that includes waste and recycling information
Require and/or encourage haulers to provide education and/or helpful hints to residents and the County semi-annually, informing them on how to and what to recycle and dispose of
Encourage big event activities to recycle by recognizing how much of the event waste goes into the trash
Develop a method to reach out to the commercial businesses in the County to discuss recycling, obtain recycling tonnages, etc.
Develop PSAs to use on local TV, public access channels and local radio networks to educate residents/businesses
Encourage the development of school competitions to get the community involved in recycling, or the participation in other state and national recycling/waste collection competitions
Be a presence at local fairs, festivals, and big event activities
Start a pledge program in the municipalities/County-wide for residents that encourages recycling and promotes proper disposal of waste
Develop a give back program for residents that take part in the pledge program
Target waste reduction and recycling at local bars and restaurants
Target waste reduction and recycling at local businesses
Implement solar compost trash cans for use in urban areas
Development of recycling education literature in multiple languages
Develop contamination education for the drop-offs
Develop education regarding pharmaceutical collection
Develop education that encourages the purchase of recycled material, incentives may be created as well
Develop Apartment Complex/Multifamily Buildings recycling literature

Rank from 1-5. 1 being very important for this planning period in Huntingdon, Bedford, or Fulton County, 5 being not important for this planning period to Huntingdon, Bedford or Fulton County.

Develop Apartment Complex/Multifamily Buildings recycling literature in multiple languages

Maintaining the existing permanent recyclables drop-off facilities
Develop a permanent income source to support the drop-off locations
Explore permanent HHW and/or e-waste collection
Streamline the recyclables collected curbside and/or at drop-offs with all local haulers in the County
Purchase surveillance cameras that move around to different drop-off sites and illegal dumping sites
Develop a hotline for illegal dumping and open burning reporting
Supporting Spring/Fall Cleanup at municipalities
Developing semi-annual County-wide e-waste collection events
Encouraging semi-annual (at minimum) spring cleanup collection events (sponsored by the municipality/school district/ private sector)
Recycling drop-off centers with 24/7 hours managed by 1 or more municipalities
Encourage a Pay-As-You-Throw waste disposal system with local haulers
Adding additional recyclables material to existing drop-off facilities
Investigating the ability to implement a swap out location using existing infrastructure (residents/businesses drop-off usable material for others to take, there would be an annual fee to belong)
Moving from single stream recycling at drop-offs to source separated recycling at drop-offs
Partner with local enforcement for illegal dumping and open burning
Encouraging contracted curbside waste collection for commercial businesses, including mandatory recyclables collection through draft contracts supplied to businesses
Contracting with waste haulers for curbside HHW and/or electronics collection
Contracting with waste haulers for curbside food waste collection
Develop a method for more comprehensive reporting of recyclables collection to the County
Develop more permanent yard waste drop-off locations (municipal or County-wide)
Develop a permanent compost facility (shared use by all residents of SCCSWA)
Ordinances that require waste haulers to collect bulk items and recyclables curbside and education to residents semi-annually
Encouraging contracted residential curbside waste collection, including mandatory curbside recyclables collection through draft contracts supplied to municipalities
Developing a public/private partnership for waste and recycling collection and infrastructure
Development of County ordinances that mandate residential recycling
Development of municipal ordinances that mandate residential recycling
Development of County ordinances that mandate commercial recycling
Development of municipal ordinances that mandate commercial recycling
Development of municipal ordinances that mandate commercial food waste composting
Develop waste and recycling initiatives for local fairs and festivals
Partner with local professional sports teams to develop waste reduction and recycling programs
Increase recycling activities at University events
Integrating aspects of the hazard mitigation plan to ensure waste disposal and emergency relief in times of need
Develop a hauler registration program
Investigate glass recycling markets
Investigate solutions to illegal dumping and open burning of recyclable material and/or MSW
Consider a zero-waste concept over the ten-year planning period
Investigate volunteer opportunities to assist the Recycling Coordinator with recycling education
